**EFInA Access to Financial Services in Nigeria
2018 Survey**

11 December, 2018

- A** | Background
- B** | Nigeria at a Glance
- C** | Financial Behaviour – Uptake & Usage
- D** | Financial Inclusion Indicator (Financial Access Strand)
- E** | Access Frontiers for achieving the NFIS Targets
- F** | Key Take Outs

A. Background

About EFInA

- Enhancing Financial Innovation & Access (EFInA) is a financial sector development organization that promotes financial inclusion in Nigeria
- EFInA's vision is to be the leader in facilitating the emergence of an all-inclusive and growth-promoting financial system. EFInA adopts a holistic approach to impact the market at three levels – micro, meso and macro levels

Leveraging A2F 2018 Surveys

- A2F research identifies the financial needs of the adult population and gives service providers data and analyses to develop innovative products to serve them
- It provides insights into regulatory and market obstacles to growth and innovation in the financial sector

Approach & Methodology

- The A2F survey has been conducted biennially since 2008.
- The size of the participants included in each of the survey prior to 2018 A2F was 24,000 with a proportional representation across states.
- Nationally representative sample of Nigerian adults (18+) across all 36 states and FCT Abuja
- Results are weighted by the National Bureau of Statistics (NBS) to provide for the total adult population and benchmarked to national population estimates for verification

Objectives of A2F 2018 Survey

- To describe the levels of financial inclusion (i.e. levels of access to financial products and services – both formal and informal)
- To describe the landscape of access (i.e. the type of products and services used by financially included individuals)
- To identify the drivers of, and barriers to financial access
- To stimulate evidence-based dialogue that will ultimately lead to effective public and private sector interventions that will increase and deepen financial inclusion
- To track financial inclusion trends in Nigeria and also to provide an assessment of changes due to interventions to enhance access and deepen inclusion

Coverage And Methodology for the A2F 2018 Survey

Design

- Designed by the National Bureau of Statistics (NBS)
- Sampling of respondents was based on equal representation (750 respondents) per state
- Allows for statistically robust headline indicators of financial access at the state, regional and national level.

Coverage

- Nationally representative sample of Nigerian adults (18+) across all 36 States and FCT Abuja
- Achieved 27,470 interviews (97% of target sample of 28,380)
- Household listing and data collection conducted from August to October 2018 by Ipsos Nigeria – a research firm, with supervision by the National Bureau of Statistics (NBS)

Questionnaire

- The questionnaire (in English), was translated into and also administered in Hausa, Yoruba, Igbo and Pidgin English

Results

- Results were weighted by the NBS to provide for the total adult population.
- Also benchmarked to national population estimates for verification

B. Nigeria at a Glance

The Nigerian adult population (18 years and above) is 99.6 million

Of this adult population:

- 63.1m (63.3%) are based in rural areas
- 49.9m (50.1%) are women
- 56.7m (56.9%) are 35 years and younger
- 20.2m (20.4%) have no formal education

- 5.2 average household size
- 1.6 average income earners per household

Source: National Bureau Of Statistics (NBS)

Nigeria has exited economic recession but is slowly recovering

Economy

- GDP grew by 0.6% from Q3 2017-Q3 2018
- Marginal increase in oil revenues due to rising oil prices
- Inflation dropped from 18% (Q3 2016) to 11% (Q3 2018)

Population

- Unemployment continues to be on a sharp rise. The rate rose from 13.9% in Q4 2016 to 18.8% in Q4 2017.
- **Nigeria is out of the recession that started in the first half of 2016. However, the marginal improvement in economic growth is not positively impacting employment levels.**

Slow economic recovery is yet to impact individuals

South Africa	36%
Kenya	14%
India	7%
Tanzania	4%

Slow economic recovery has resulted in more small businesses, largely in agriculture

C. Financial Behaviour – Uptake and Usage *Deposit Money Banks (DMBs)*

Banked population is up from 36.9m in 2016 to 39.5m in 2018

Total population: 99.6 million

	2016	2018	Growth/ decline
Banked population	38.3%	39.7%	+1.4%
Remittances (send and receive)	24.2%	22.4%	-2.2%
Savings with a bank	27.7%	21.0%	-6.7%
Payments	12.1%	15.5%	+3.4%
Receive income	8.4%	9.7%	+1.3%
Loan with a bank	1.3%	1.3%	Stable
Banking agents	2.6%	3.3%	+0.6%

More banked people are using their bank accounts

- 68.7% of bank clients used at least one bank product during the month prior to the A2F 2018
- 4.6% used at least one product during the 6 months before the survey
- 26.8% of the banked adults have dormant account, meaning the account was not used in the past 90 days year prior to the survey

Affordability and institutional exclusion are the biggest obstacles to having a bank account

Unbanked population = 60.1m

Barriers	Net %
Affordability	64.9
Institutional exclusion	38.4
Attitudes/perceptions	23.6
Other	4.5

Financial Behaviour - Uptake and Usage
Other Formal/Regulated (non-DMBs) Institutions

28.5% of adults use other formal financial institutions. This is slightly down from 30.1% in 2016

Total population: 99.6 million

	2016	2018	Growth/ decline
Other formal (non-bank)	30.1%	28.5%	-1.6%
Pension	7.8%	8.0%	0.2%
Savings*	5.0%	3.7%	-1.3%
Mobile Money	1.6%	3.3%	+2.2%
Mobile Money agents	0.2%	1.1%	+0.9%
Insurance	1.7%	1.6%	-0.1%
Remittances	0.9	1.5%	+0.6%
Loan with other formal institutions	1.0%	1.3%	+0.3%

*Fixed deposit, stock/shares, mutual funds, saving with Microfinance Bank etc.

Increased Usage of Mobile Money and Microfinance Banks

2018 Total population: 99.6 million

■ 2016 ■ 2018

Microfinance Bank= 3.0m

Mobile Money= 3.3m

Savings **62%** **-12%**

Remittances **57%** **+12%**

Credit **56%** **+13%**

Airtime purchase **26%** **+1%**

Remittances **15%** **-2%**

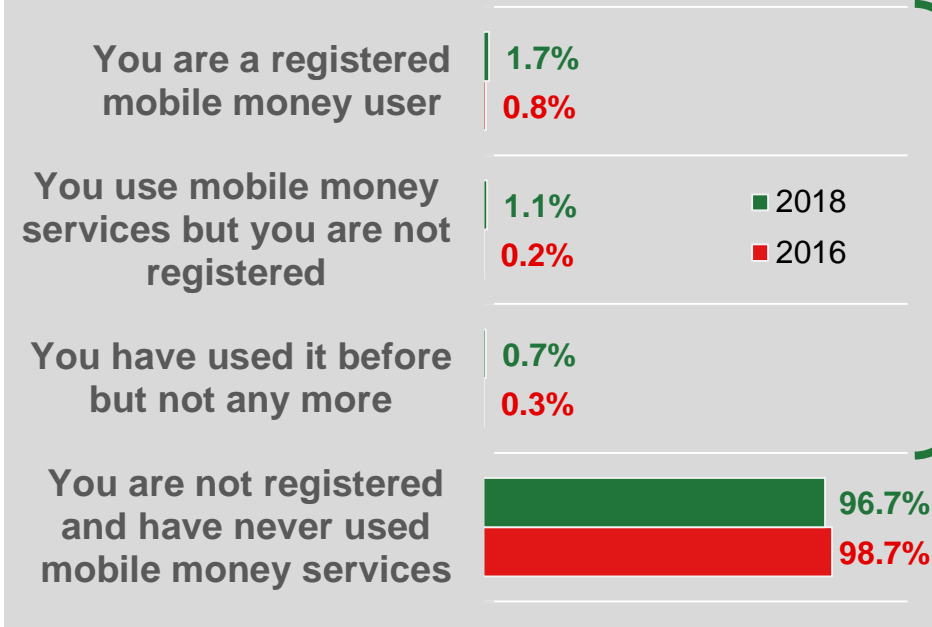

Paying bills **9%** **+1%**

Landscape

Although registered users have doubled since 2016, overall, mobile money usage remains low

Total population: 99.6 million

Mobile Money Experience

Drivers for Mobile Money uptake

For sake of ease	55.0%
To conduct fast transactions	49.1%
Family/friends are using mobile money	20.7%
To conduct safe transactions	13.8%
To store/save money	12.5%
Just to try or test mobile money	4.6%
To pay bills	4.0%

Lack of awareness remains the key barrier to the use of Mobile Money and Insurance

Do not have/use Mobile Money = 96.3m

Do not have Insurance = 97.9m

Mobile Money currently deepening rather than expanding inclusion levels, as Mobile Money services are being taken up by the banked population

Total population: 99.6 million

- 36.7% (36.5m) adults use bank account only
- 3.1% (3.0m) adults have both mobile money and bank account
- 0.3% (313k) adults have mobile money wallet only
- 60.0% (59.4m) neither have mobile money nor banking account
- Clear strategy to target non-bank population to take up mobile money services is required

Potential to drive financial inclusion levels by targeting 82% of Nigerians who currently receive their main income in cash

- Based on main source of income, 17% of adults are subsistence farmers, 38% own businesses (farming, non-farming, and services), and 9% receive money from family/friends
- Over 97% of both subsistence farmers and business owners (farming, non-farming, and services), receive their income in cash
- 12% of adults that receive money from family/friends get it via bank account or mobile money wallets
- G2P and B2P (formal) are driving income received via bank accounts and mobile money wallets

Overall, over 15 million Nigerian adults (16%) made at least one digital payment for goods and services in the past 12 months

Financial Behaviour - Uptake and Usage
Savings, Credit and Remittance

Savings: Majority of Nigerian adults save, but savings overall declined

Where adults save

	2016 (65.6m)	2018 (54.5m)
Saving with a bank	40.7%	38.3%
Saving with other formal institution	12.3%	9.7%
Informal	31.4%	42.7%
Family/friends	47.2%	33.0%

Credit: Majority of Nigerian adults did not access credit in the past 12 months

Sources of loans

	2016 (31.5m)	2018 (29.7m)
Loan from bank	3.8%	4.3%
Loan from other formal	2.8%	4.0%
Informal	19.3%	23.2%
Family/friends	83.8%	77.7%

Remittances: 43.1m Nigerian adults received or sent money in the past 12 months

- 17.9 m Nigerian adults remit money through family/friends ONLY,
- 82.1% of those remitting through family/friends have access to mobile phones
- 83.3% of those remitting through family/friends are not aware of mobile money

Remitting channels

	2016 (41.9m)	2018 (43.1m)
Banking channels	58.2%	51.5%
Other formal	1.9%	3.5%
Informal	9.1%	7.8%
Family/friends	52.9%	56.8%

D. Financial Access Strands (FAS)

Defining financial inclusion

Financial Access Strand 2018

- Over 60% of the Nigerian adult population are now financially included
- Financially excluded proportion of the adult population still remains large

Note: These four strands are mutually exclusive

Trends In Financial Access Strand – 2008 to 2018

Between 2016 and 2018:

- Significant gains in financial inclusion as excluded population declined by 4.8% from 40.1 million to 36.6 million
- Proportion of the formally served remains static at just below 50%

Adult Population
18+ Years

Financial inclusion Consumer Access Strand (ranked by banked population)

- Nigeria has a fairly large banked population (39.7%), but also has the highest proportion of financially excluded adults at 37%

Note: There are some slight differences in the classification of products/services in the categories of the access strands between the countries

Overlaps in Financial Access

- Consumers generally use a combination of financial products and services to meet their financial needs
- 33.8% rely on formal financial services only, up from 29.2% in 2016
- 15.0% use a combination of formal and informal mechanisms to manage their financial needs, thus indicating that their needs are not fully met by the formal sector alone

*Figures may include overlaps across access strands

Financial inclusion Overlaps

- Adults who rely on formal services only increased from 29.2% to 33.8% since 2016
- Adults using a combination of formal and informal declined from 19.4% in 2016 to 15.0%

Financial Access by Gender

- Financial access is skewed towards male adults
- Adult men are more likely to be banked than adult women
- Adult women tend to use more formal-other and informal financial services than adult men

Financial Access by Age Group

- The 26 – 35 age group has the highest population but rank second for formal financial inclusion
- The highest level of formally included are in the 36 to 45 age group
- The highest level of financial excluded are in the 18 to 25 age group

Adult Population 18+ Years

Financial Access by Urban/Rural Setting

- Banking services are not getting to rural areas, BUT the data shows an increase of 3.2% among rural population
- Informal financial services continue to be dominant in the rural areas
- Interventions dealing with key excluded populations seem to be slightly bearing fruits; rural population reduction in the excluded population is 6.6% higher than the national average

Financial Access Performance Across Geo-Political Zones

	Pension	40%	5%	2%	5%	7%	8%	-32%
	Financial Exclusion	20%	46.3%	39.7%	39.5%	41.6%	36.8%	-16.8%

DEFINITION OF INDICATORS

Payments:	% of adult population that has a transaction account with a regulated financial institution and/or has made an electronic payment through a regulated financial institution in the last 12 months
Savings:	% of adult population that has a savings-related product at a regulated financial institution and/or has saved through a regulated financial institution in the last 12 months
Credit:	% of adult population that has had a credit product through a regulated financial institution in the last 12 months
Insurance:	% of adult population that is covered by a regulated insurance policy
Pension:	% of adult population that is contributing to a regulated pension scheme or receiving a pension through a regulated pension scheme

E. Access Frontiers for achieving the NFIS Targets

Access Frontiers – Identifying the Opportunities

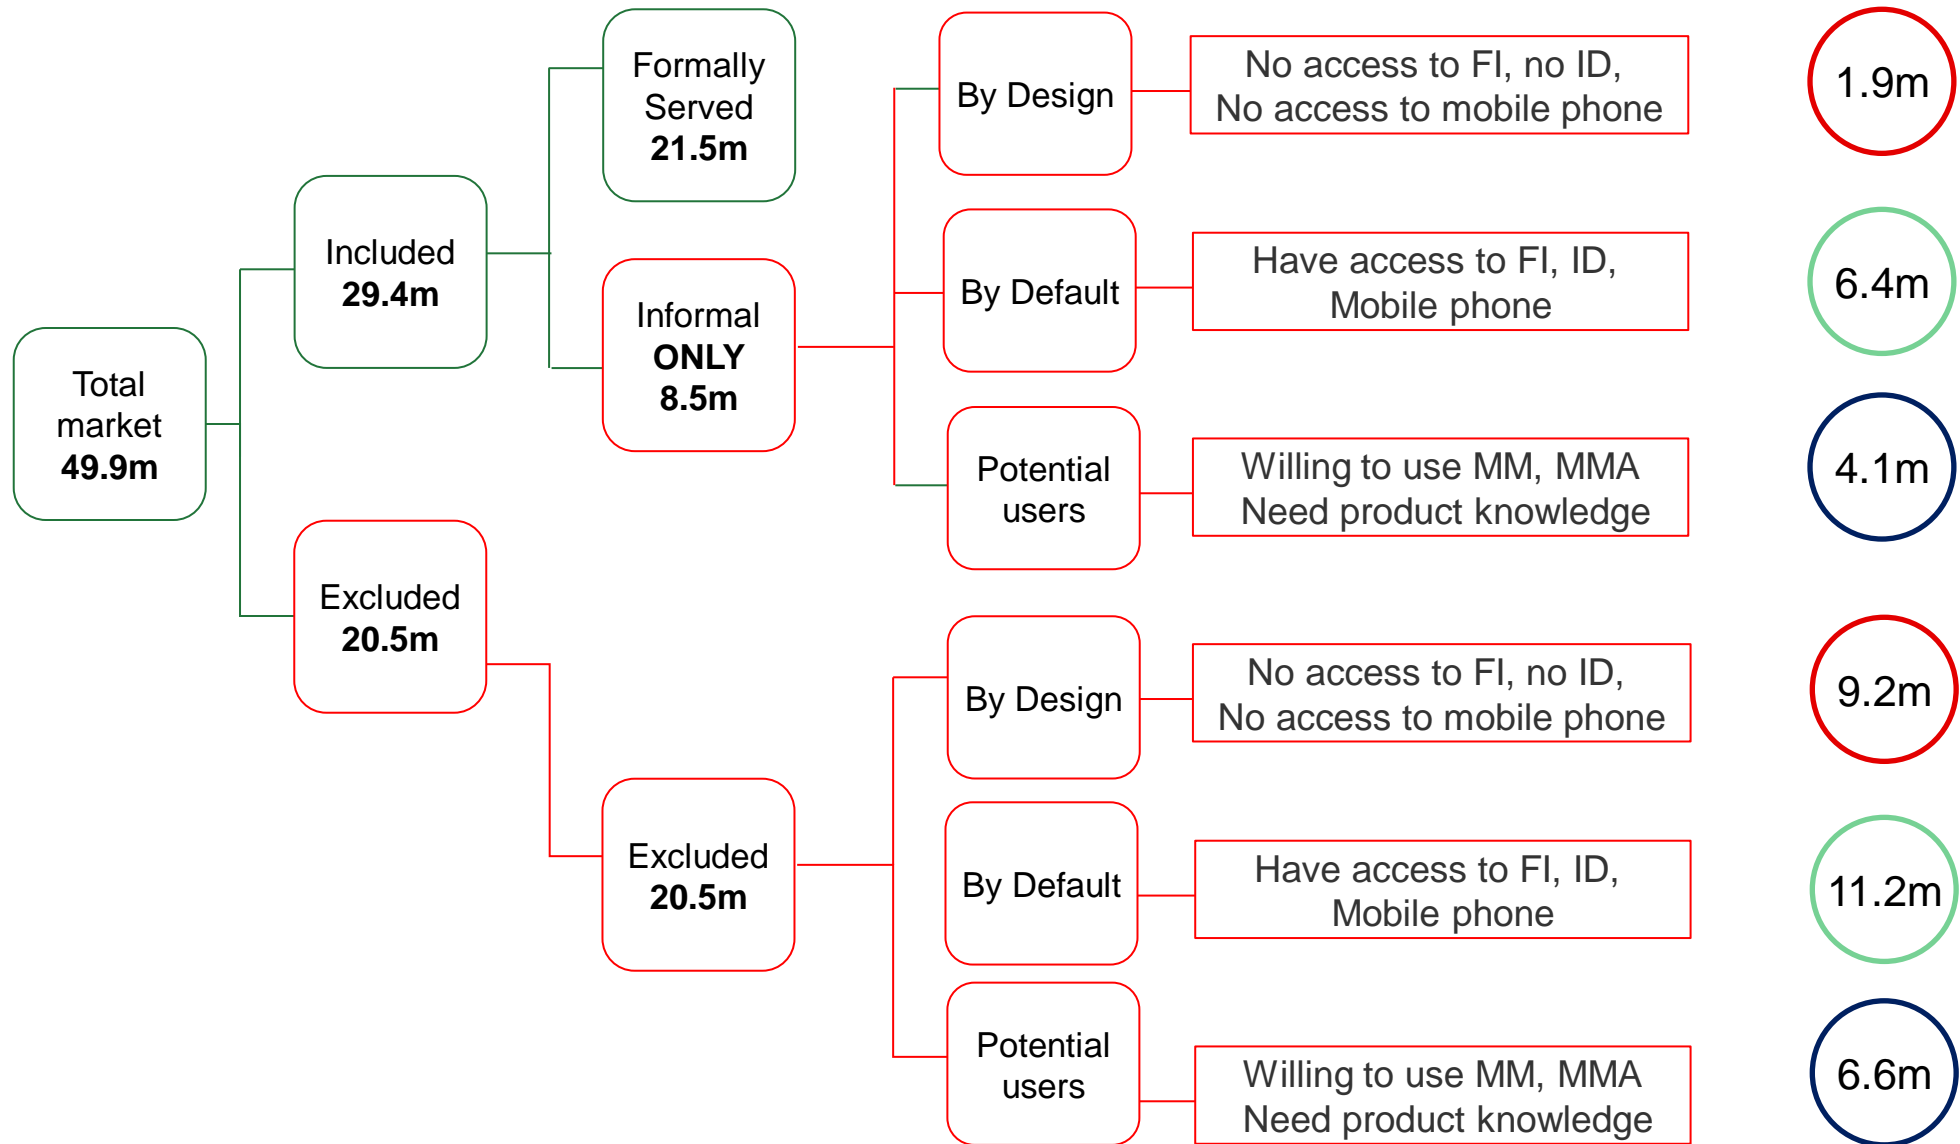

Access Frontiers – Overall Excluded

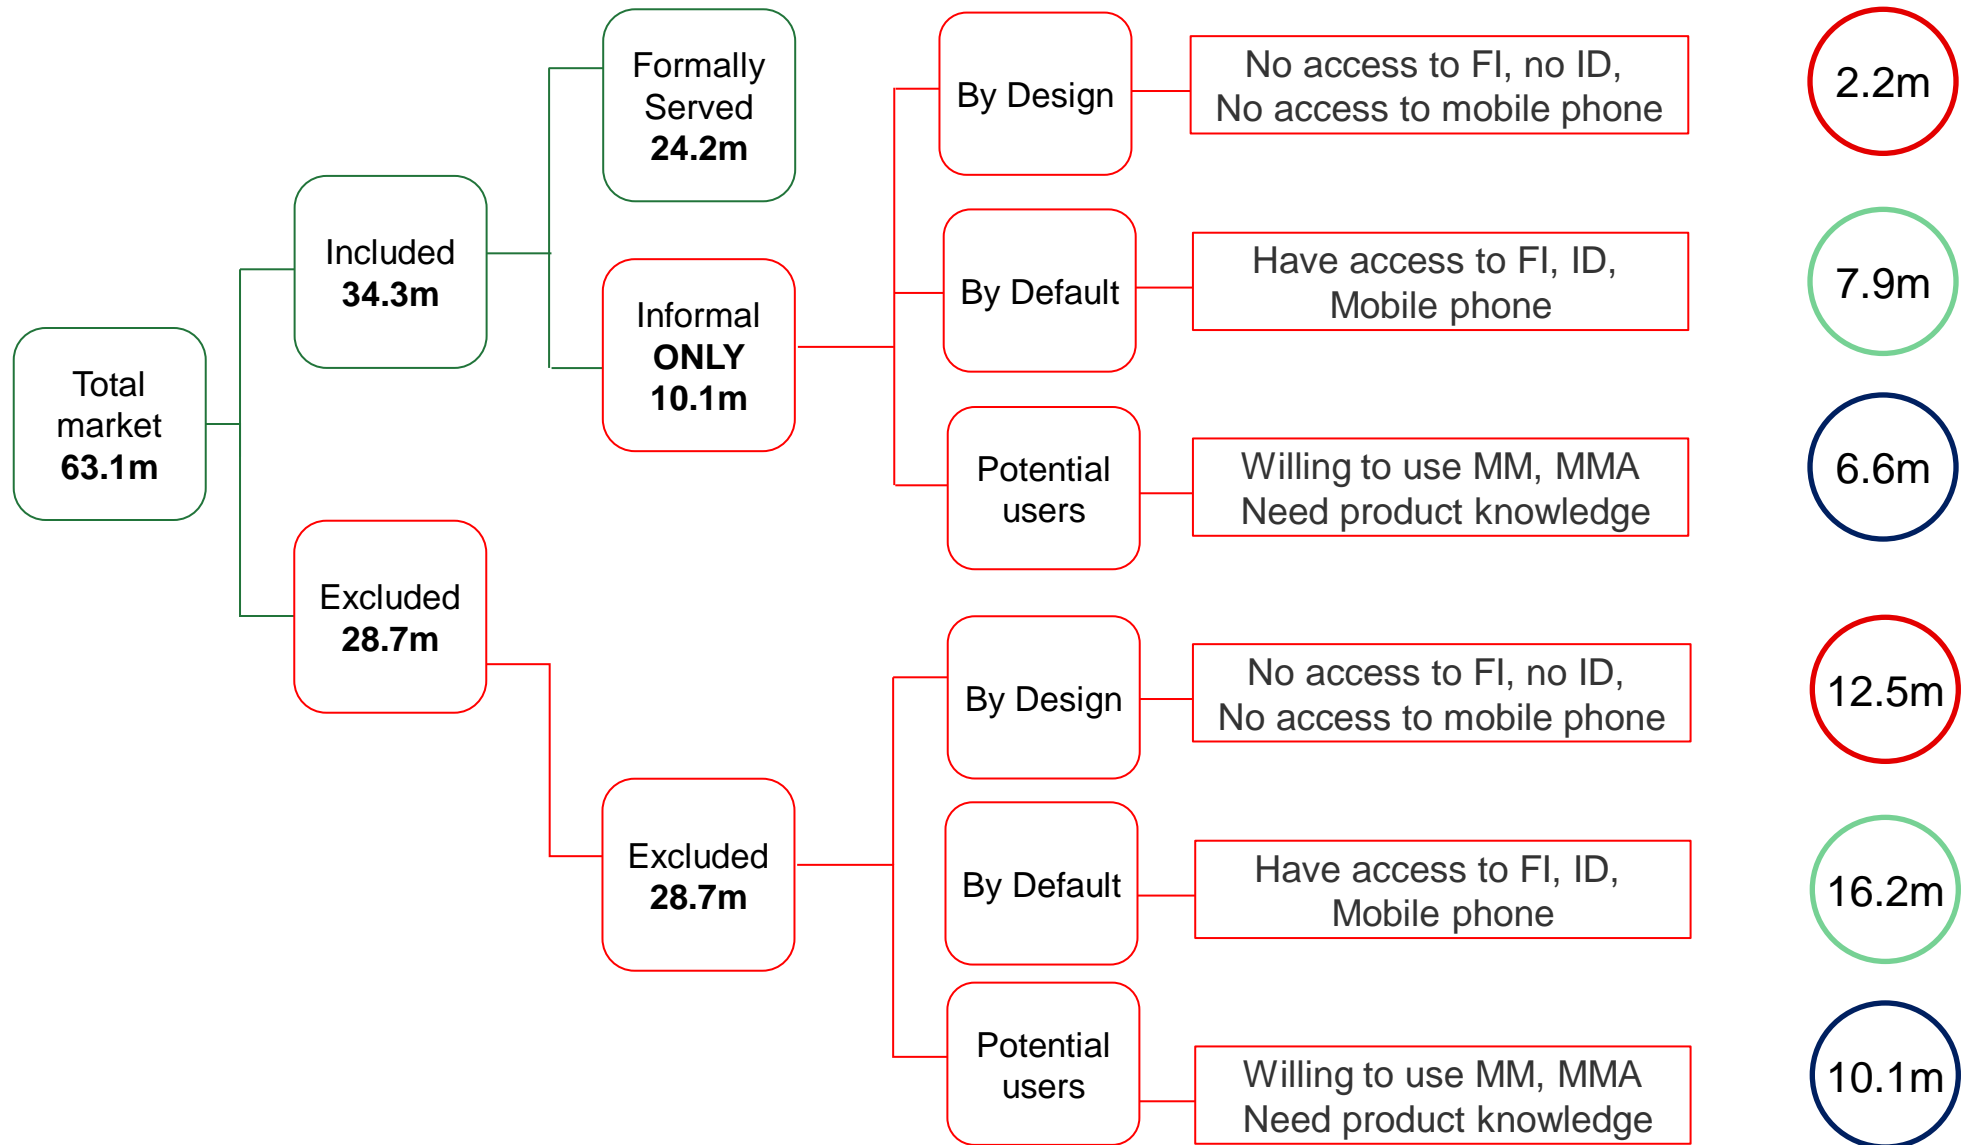

40% of the excluded have access to neither FI nor a mobile phone

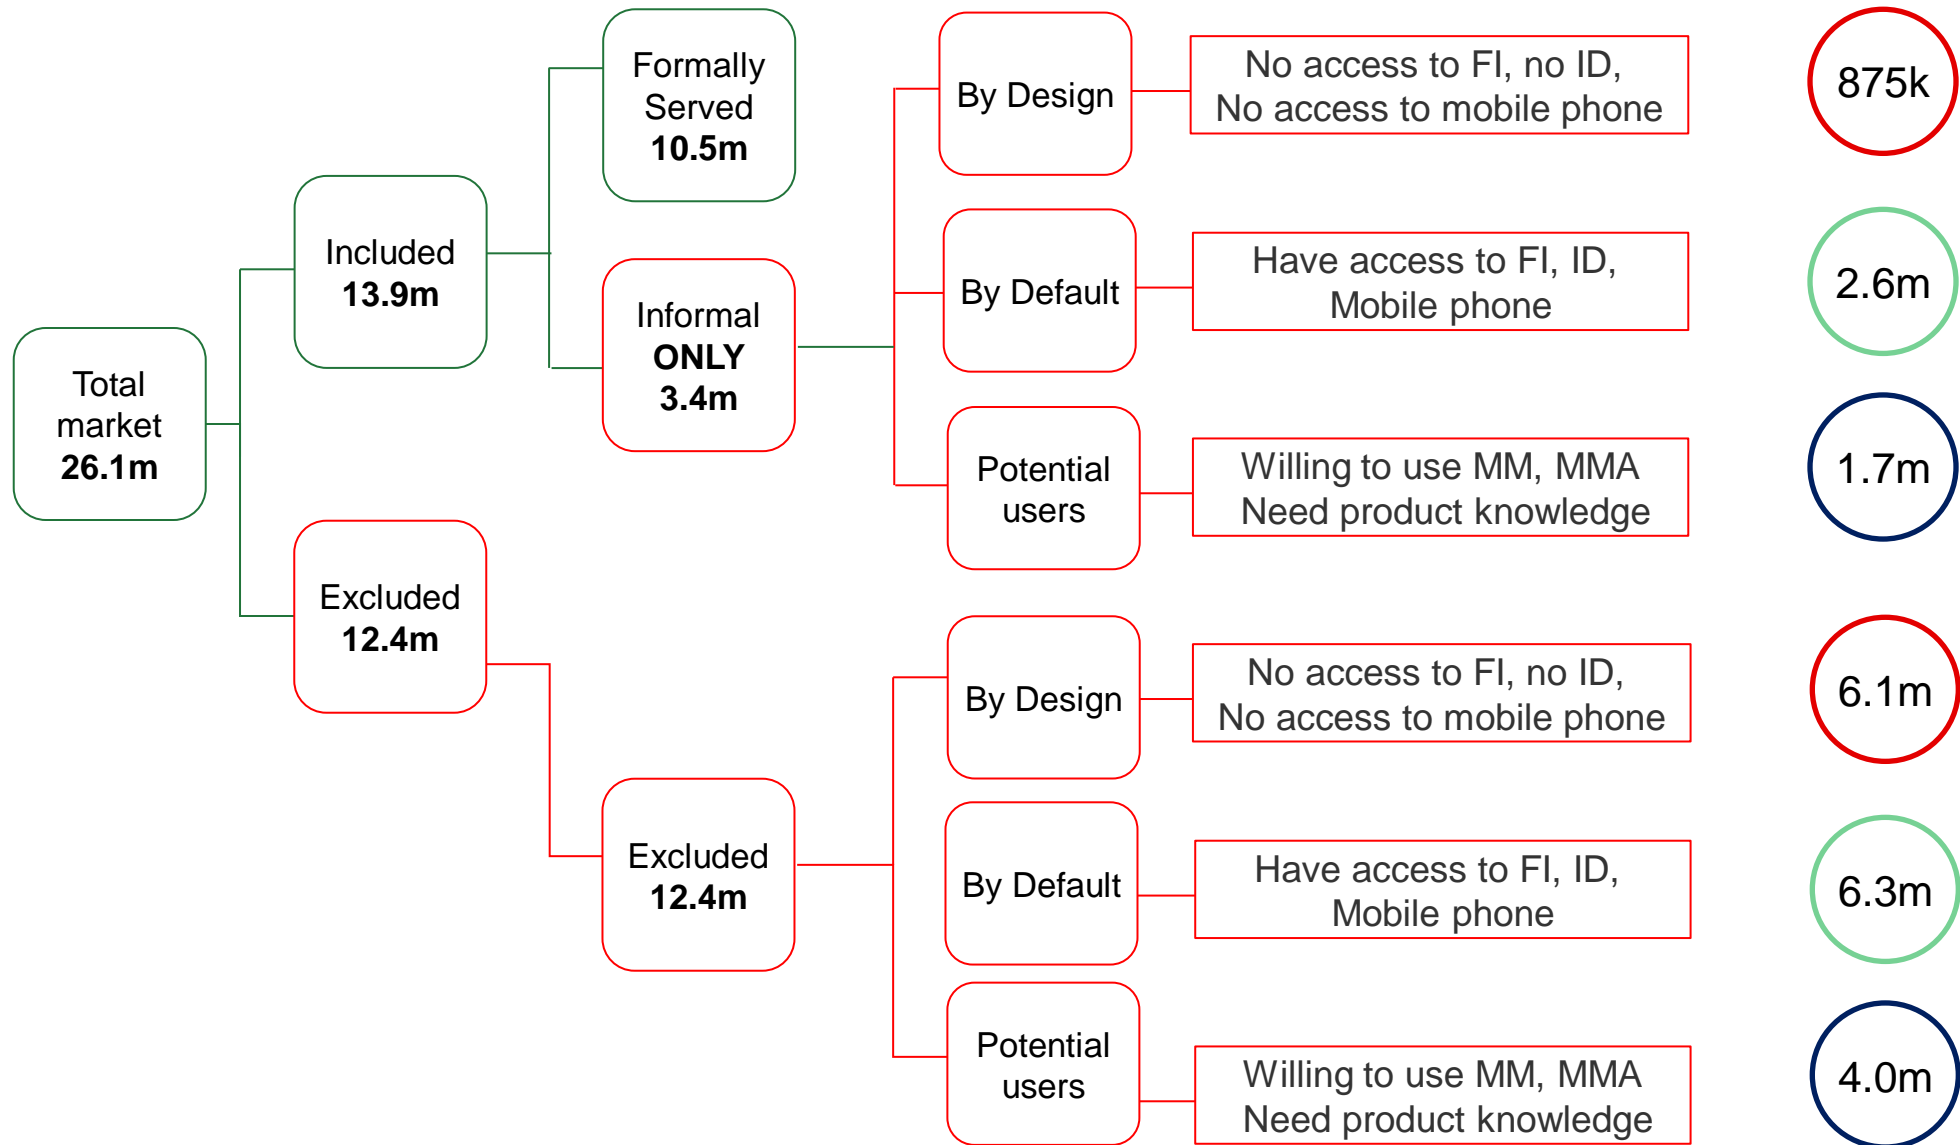

Access Frontiers – Women

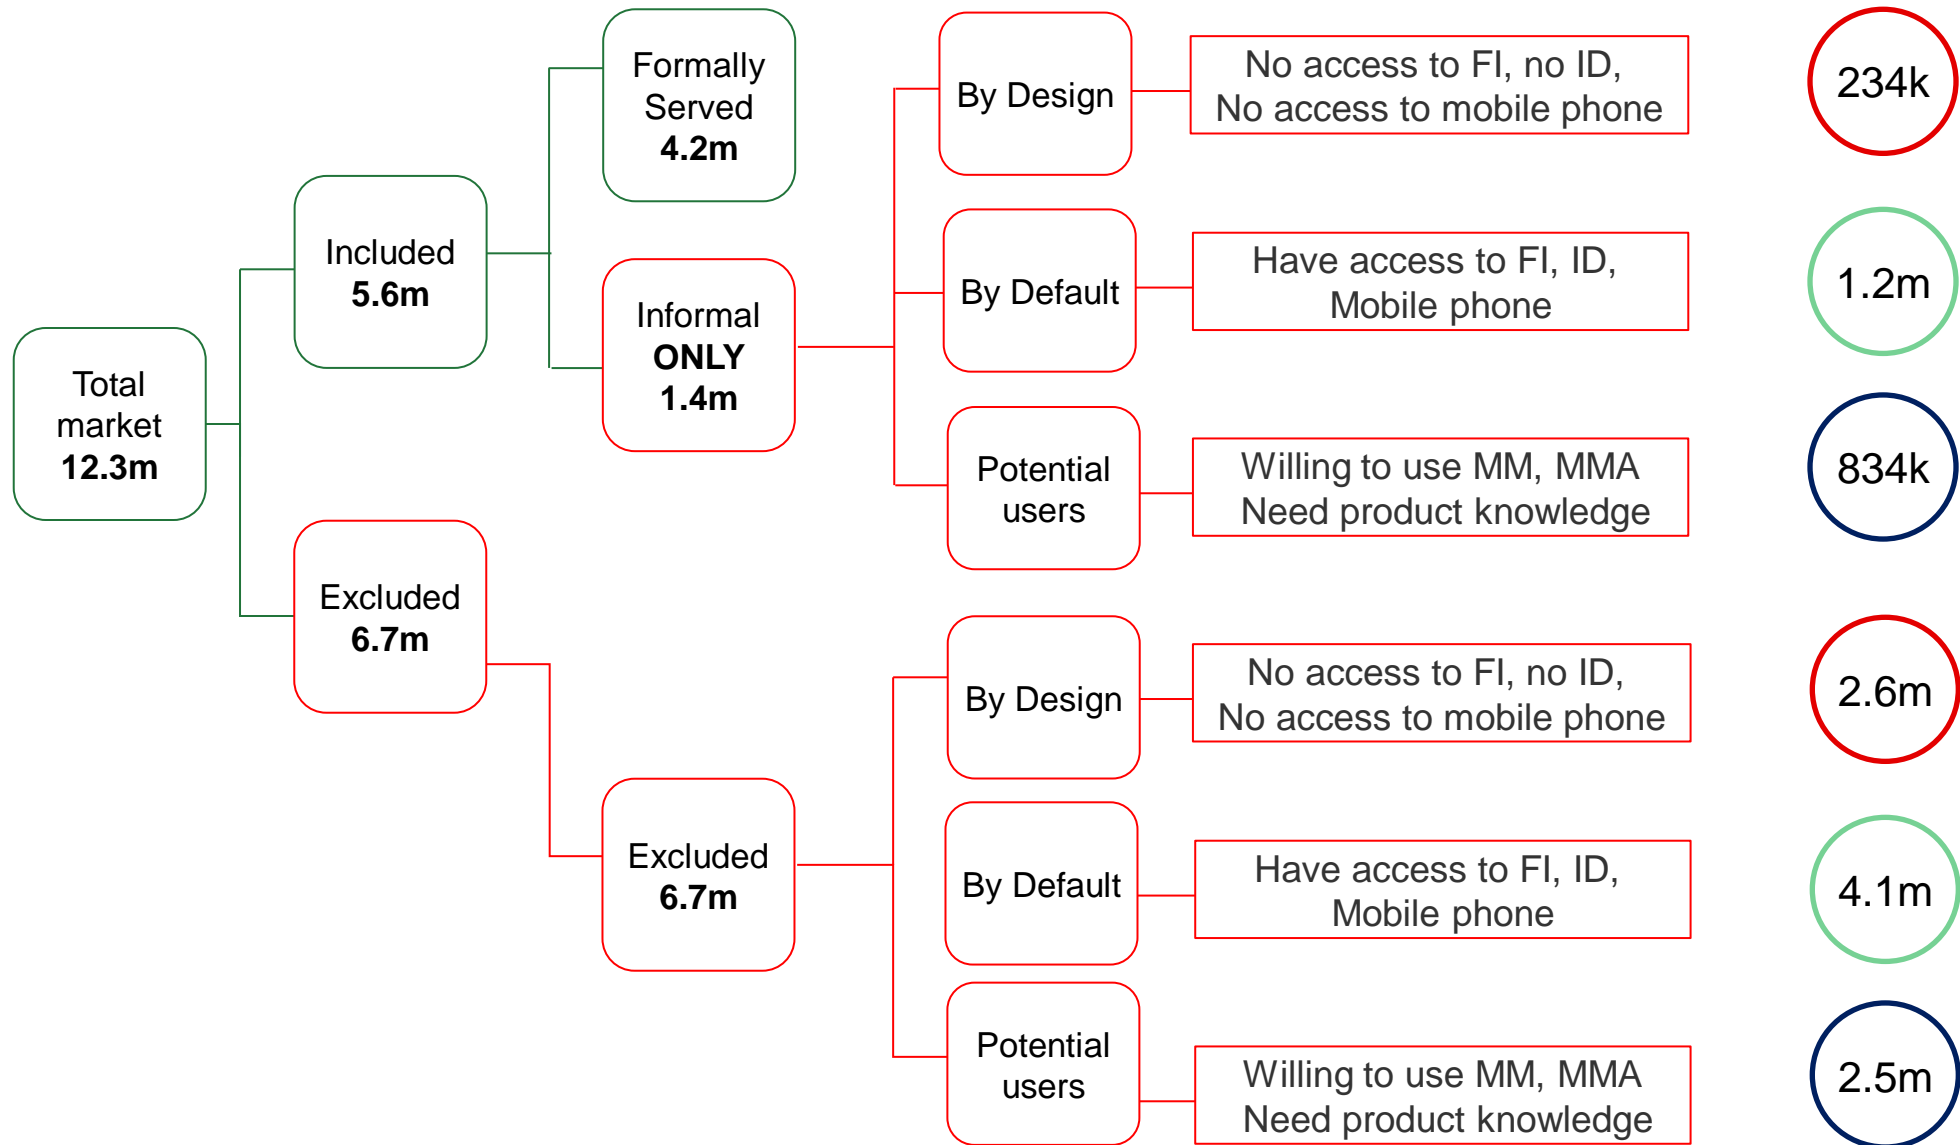

Access Frontiers – Rural population

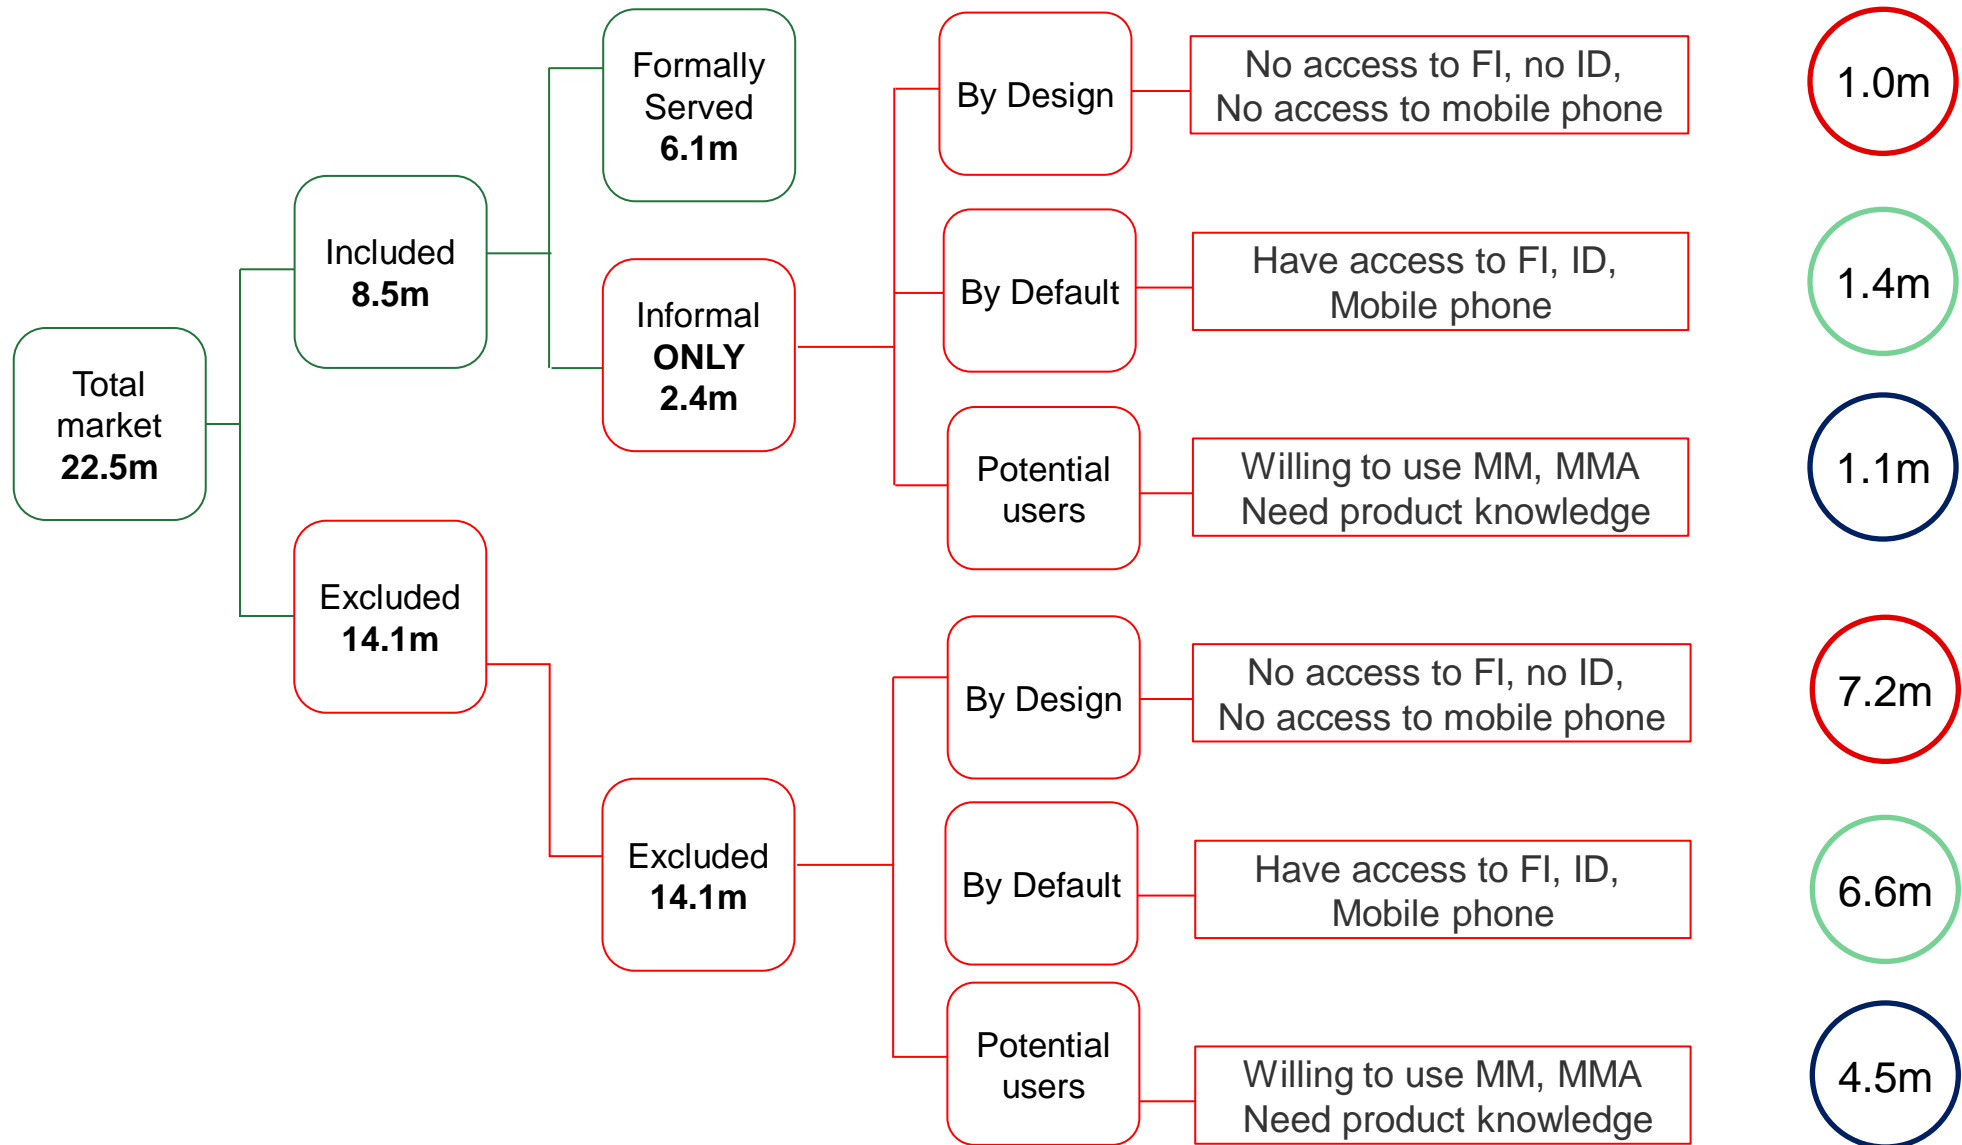

Access Frontiers – Youth

Access Frontiers – North East

Access Frontiers – North West

Key Take outs

Key Take Outs

- Formal labour market is not absorbing enough Nigerians
- Reduction in formal employment has led to reduced disposable income and savings
- Adults resort to starting small businesses (driven by the agric sector) to survive
- Day to day expenses are the most important financial need while planning for unexpected shocks and planning for long term goals are second and third priorities respectively
- Banked population went up by 1.4% – the growth has been largely driven by transaction products
- The number of adults relying on informal financial mechanisms ONLY increased significantly – as more adults move into informal employment
- Payments are mostly cashed-based, driven by the size of the informal sector
- Digital payments increased from 12% in 2016 to 16% in 2018, driven by the deepening of financial inclusion. Mobile money usage is driven by the banked population
- Main barriers to financial inclusion remain lack of product/services, awareness and knowledge, and institutional exclusion and affordability

Data Dissemination Options

EFInA Access to Financial Services in Nigeria 2008 / 2010 / 2012 / 2014 / 2016 / 2018 surveys

- Comprehensive database where information can be segmented in multiple dimensions, e.g., gender, geopolitical zone, age, education, etc.
- Data will be provided in SPSS or Ms Excel format
- Key findings can be downloaded from the EFInA website

Data Options

- Data request form can be downloaded from the EFInA website
 - Full dataset
 - Limited number of variables
 - Customised analysis
